

Adjustments to new website

1. Add Concessions to Assessments
2. Add a "Learning Support" Section to Assessments
3. ~~Formatting of writing more spacing? Headings?~~
4. Photo on Contact Page?
5. ~~Prices?~~
6. ~~Link on Assessments to Your Family article link (under school readiness)~~
7. ~~I think we can afford to make the subheadings smaller so that they can be clearer:
homeopathy, assessment~~
8. ~~Landing page on Homeopathy – it has moms about to pop at the moment~~

See below:

~~Paedia 'tricks' provides homeopathic treatment to support the development of children from the very beginning of life. Paediatric homeopathic therapy eases little ones through their developmental phases to optimise their health with tailor-made prescriptions.~~

~~Difficulties can arise at any point in a child's development: Infants can struggle with their new environment outside the womb with physical symptoms such as feeding difficulties, colic, rashes, diarrhoea, constipation and fevers. The transition to toddlerhood is often fraught with difficulties created by a budding personality and the need for independence. Tantrums, issues around potty training and nightmares demonstrate their emotional turbulence. On a physical level, illnesses contracted from more frequent exposure to playmates may overwhelm the body's defences and lead to infections (such as conjunctivitis, ear, nose, throat and chest infections). During childhood the challenges of schoolwork may bring to the fore issues such as attention difficulties, sleep problems, enuresis and anxiety, whilst peer pressure may bring out new emotional reactions relating to socialising. Physical problems such as growing pains and childhood infections illnesses are also common. Finally, adolescence is filled with whirlwinds of change that may create havoc in the teenager. Homeopathic assistance may therefore be needed to see an adolescent through depression, exhaustion, acne, menstrual issues and emotional difficulties.~~

9. ~~Not sure about layout maybe picture smaller? Or writing on top can we compare?~~
